

W. L. Butler's Online Waste Tracking System

What is W. L. Butler's Online Waste Tracking System?

W. L. Butler's Online Waste Tracking system requires all Subcontractors to upload their Recycling Data to verify recycling compliance with W. L. Butler's Zero Waste Policy and commitment to the environment. If you are a subcontractor on W. L. Butler projects you are required to comply with this requirement and upload your recycling tickets for your portion of the work before payment to you is released. The system tracks whether or not you are meeting the recycling requirements as outlined by W. L. Butler's waste management plan for your project, therefore your participation in this program is required and will assist in expediting payments to you. If you have any questions about the waste management plan for your project(s) please contact us at 1-888-525-1301.

You can upload your recycling data to the system with your computer or mobile device and if you need assistance call the tech support line or click the Live Help button during business hours. Once data is uploaded, the system will notify W. L. Butler and a W. L. Butler representative will review your data. Please make sure your data is legible or it will be rejected. Thank you for your participation and if you need any assistance please contact us.

To submit your Waste Tickets, follow these simple steps:

1. Go to www.ac2.wastetracking.com
2. Enter your Project Tracking Number in the Subcontractor Log In area to the right and click
3. Verify.
4. Identify yourself as the Subcontractor in the dropdown menu and click Continue.
5. Enter the information as reflected on your Ticket, upload a scanned copy or picture of the ticket and
6. Then click SUBMIT TICKET to submit your Ticket to DPR.
